DETAILED ACTION

Specification

1. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: page 1, lines 19-22; page 2, line 9: "width shows *on* its order".

Priority

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Colombia on 9/26/2002. It is noted, however, that applicant has not filed a certified copy of the 02075481 application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claim 1, it is unclear to Examiner if applicant intends to claim one or two distinct layers of "natural latex or rubber." If intended, Applicant should modify claim 1 to specifically claim each individual layer of "natural latex or rubber". Proposed

Art Unit: 3673

change would be --an outer textile padded layer *sewn* to a natural latex or rubber layer; *another* distinct natural *latex* or rubber layer perforated and passing over--

6. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Appropriate correction is required.

7. The term "preferably" in claim 1 is a relative term which renders the claim indefinite. The term "preferably" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.
